ABSTRACT

Key Words: Genre, Review Text, Generic Structure of Review Text

The purposes of this graduating paper were to describe the parts of generic structure which were applied by the authors in creating the review text, and find the dominant part of generic structure which were used by students of sixth semester of IAIN Salatiga in the academic year 2015/2016. The researcher used descriptive qualitative method by describing and analyze the data taken from 30 texts made by student. So in conducting the study the researcher used documentation method for collecting the data. The researcher took 30 review texts made by the students which collected by the lecture of the Literature Appreciation classes. There were two findings. Firstly, orientation occurred 100%, interpretative with one paragraph occurred 20%, interpretative with two paragraphs occurred 40%, interpretation with three paragraphs occurred 20%, event with four paragraphs occurred 0%, and interpretative with six paragraph occurred 10%, evaluation on their reviews occurred 60%, and evaluation only occurred 10%. Secondly, the researcher found that orientation was dominant part of generic structure which were used by the students.
